

1-DAY ACUVUE® MOIST® Brand Contact Lenses

- 1-DAY ACUVUE® MOIST® Brand Contact Lenses are one of the healthiest and most convenient ways to wear contact lenses; wear them one day so they're always fresh and comfortable with no cleaning or hassles
- 1-DAY ACUVUE® MOIST® Brand is the only daily disposable lens with LACREON® Technology that locks in a moisture-rich ingredient, for a fresh lens feeling and excellent end-of-day comfort
- These lenses are visibility tinted and have an inside-out mark for easy handling
- Class II UV protection on average blocks 82% of UV-A radiation and 97% of UV-B radiation from the sun. ‡

- Introducing 1-DAY ACUVUE® MOIST® Brand Contact Lenses for ASTIGMATISM—clear, stable vision with the comfort and convenience of a daily disposable lens.
- 1-DAY ACUVUE® MOIST® Brand for ASTIGMATISM gives you clear and comfortable vision from the moment you put them in, to the moment you toss them at the end of the day.
- 1-DAY ACUVUE® MOIST® Brand for ASTIGMATISM BLINK STABILIZED™ Design helps keep your vision clear and stable all day long— even for people with an active lifestyle
- 1-DAY ACUVUE® MOIST® Brand is the only daily disposable lens with LACREON® Technology that locks in a moisture-rich ingredient, for a fresh lens feeling and excellent end-of-day comfort
- Class II UV protection on average blocks 82% of UV-A radiation and 97% of UV-B radiation from the sun. ‡

Important information for contact lens wearers: ACUVUE® Brand Contact Lenses are available by prescription only for vision correction. An eye care professional will determine whether contact lenses are right for you. Although rare, serious eye problems can develop while wearing contact lenses. To help avoid these problems, follow the wear and replacement schedule and the lens care instructions provided by your eye doctor. Do not wear contact lenses if you have an eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. If one of these conditions occurs, contact your eye doctor immediately. For more information on proper wear, care and safety, talk to your eye care professional and ask for a Patient Instruction Guide, call 1-800-843-2020 or visit Acuvue.com.

‡Helps protect against transmission of harmful UV radiation to the cornea and into the eye. **WARNING:** UV-absorbing contact lenses are NOT substitutes for protective UV-absorbing eyewear such as UV-absorbing goggles or sunglasses because they do not completely cover the eye and surrounding area. You should continue to use UV-absorbing eyewear as directed. **NOTE:** Long-term exposure to UV radiation is one of the risk factors associated with cataracts. Exposure is based on a number of factors such as environmental conditions (altitude, geography, cloud cover) and personal factors (extent and nature of outdoor activities). UV-blocking contact lenses help provide protection against harmful UV radiation. However, clinical studies have not been done to demonstrate that wearing UV-blocking contact lenses reduces the risk of developing cataracts or other eye disorders. Consult your eye care practitioner for more information.
